NOTES

Regina is a 56 meter classically styled schooner which was built by Pruva Yachting in 2011. The Yacht has been designed with elegance, romance, and space; performing as to a high performance ocean-going vessel, she is MCA compliant. Regina has an exceptionally wide beam of 9.5 meters providing wide deck spaces and great areas for relaxing both inside and out; there are separate deck areas for sunbathing, al-fresco dining both to the aft and forward.

Regina has an exceptional interior layout designed by Aylin Örs, achieving a clean and traditional atmosphere; including the large dining and sitting saloon with an immaculate classic mahogany finish. Regina can accommodate 12 guests in 6 beautifully finished en-suite cabins. Each classically designed cabin features absolutely stunning details, such as bedheads of solid honey mousse onyx columns, walls of Afyon Mar-ble and solid onyx sinks and flooring. The Master stateroom is full beam with a lounge area and walk-in dressing room. The second state-room to the fore of the yacht is just as impressive. Between the staterooms there are a further 4 cabins, 2 large en suite doubles, 1 smaller double and a twin cabin with 2 single beds. There is air conditioning throughout Regina, with a fresh air ventilation system installed in all enclosed spaces.

Regina is powered by Doyle Sails providing a total sail area of 1,140m² and has twin 440hp MAN engines. For security the ships alarms systems and engine data are monitored using a computerised PLC monitoring system. Regina has a steel hull built with both lateral and longitudinal frames to ensure stability of the yacht in types of sea conditions. Her rigging has been designed by Christopher John Mitchell (AES Ltd.)

Finalist at the 2012 World Superyacht Awards

Regina is infamously renowned for her appearance during the award winning James Bond film, Skyfall.
